

The image displays two terminal windows side-by-side, illustrating the compilation and execution of a C program. The left window, titled 'Container hgu-connet (container1) @ desktop', shows the compilation of 'occ_server.c' using 'gcc -o temp_exec %s 2>&1, file_name'. The right window, titled 'Container hgu-connet (container2) @ desktop', shows the compilation of 'occ_client.c' using 'gcc -o temp_exec %s 2>&1, file_name'. Both windows show the output of the program, which is 'Hello Handong Global University!!!'.
